- Python For Everybody, an online non-credit course authorized by University of Michigan, *May* 2020

PROFESSIONAL EXPERIENCE

Associate
Cognizant | 2021 - Present

- Working as a developer in Healthcare Product Consulting(HPC-Technical) with our client EmblemHealth using SQL Developer, Facets, TFS and ALM as key tools.
- Engaged in database maintenance tasks aligned with business requirements, followed by the analysis and implementation of diverse PL/SQL functions, stored procedures, and packages.
- Understanding the business requirements and providing essential reports to the client through the utilization of SQL queries
- Diligently worked to resolve critical production issues within the specified timeframe.
- Experienced to work in the Production Support team - handled production incidents and service requests from clients and implemented solutions for Business-critical items.
- Supported and trained team members on our project workflow and its associated tasks.

PROJECTS

- **My Portfolio** (*https://github.com/shresthagpt21/My-Portfolio*): A responsive webpage designed from scratch using-HTML,CSS JavaScript, concepts of DOM integrated with various other user interactive functions.
- **Realtime Weather Application** (*https://github.com/shresthagpt21/WeatherApp*) : React based web-app which extensively uses the concepts of Hooks, State variables, props, error handling and integrated with a weather API to fetch real-time weather data based on the user's location input.
- **News Express** (*https://github.com/shresthagpt21/MyNewsBrowser*): A web responsive News App that uses news API to fetch news in different categories. Technologies used-HTML,CSS, Javascript, Bootstrap, API calls, async functions, concepts of Hooks, DOM and many concepts which add to a very smooth user interactivity.
- **Movie Browser** (*https://github.com/shresthagpt21/MovieBrowser-React*): Technologies used-HTML5, CSS, Javascript, Movies API, React JS, React concepts such as Router, Hooks, props along with class and function based components.
- **Currency Converter** (*https://github.com/shresthagpt21/CurrencyConverter*): React based app which uses currency API to fetch the conversion units for different countries as per the user input.
